AVATAR PROJECT BI-ANNUAL MEETING IN LUXEMBOURG: FOSTERING COLLABORATION AND INNOVATION

We're delighted to share the highlights from our recent bi-annual meeting held in Luxembourg. The event was a great success, bringing together esteemed members from across Europe to discuss our project's future.

Key Highlights:

1. Venue: Our meeting venue in Luxembourg provided an inspiring backdrop for our discussions.
2. Collaborative Exchange: Members engaged in fruitful discussions, sharing insights, progress updates, and best practices.
3. Project Updates: Exciting updates were shared on research findings, technological advancements, and upcoming milestones.
4. Networking Opportunities: Attendees had the chance to network and strengthen professional relationships.
5. Future Outlook: We concluded with a focus on our future endeavors and the importance of continued teamwork and innovation.

We extend our gratitude to all participants for their active involvement and contributions.

PROJECT POSTER AT LOPEC 2025

From the 5th to the 7th of March, our esteemed project team member Anna Krzyzanowska represented us at a prestigious conference focusing on printed electronics. Anna showcased our project's groundbreaking work by presenting a poster during the conference's poster session.

The poster highlighted the significant achievements of our project, particularly focusing on the development and implementation of printed strain gauges. Anna's presentation was well-received, garnering attention and sparking discussions within the printed electronics community. We are proud of Anna's dedication and contribution to our project's success. Her participation in the conference further solidifies our commitment to innovation and excellence in the field of printed electronics.
